Multiple systems.  
Limited resources.

## MAINTAINING a secure and viable system

### IT Professional | Making it Humanly Possible

As the technology leader for your organization, the issues you deal with every day are complex:

- Lowering your cost of ownership while meeting constantly evolving requirements
- Working toward global interoperability among disparate systems
- Providing centralized control for easy connectivity, deployment, expansion, and customization
- Protecting system security and document privacy
- Supporting the unique requirements of every system user
- Choosing a technology partner who will be with you for the long run—to make sure the investment is working to its full potential

These demands are intensifying at a time when resources are reduced and you are asked, each day, to do more with less.

At 3M Health Information Systems, we understand what keeps you up at night. We can help you do more with flexible technology solutions that save time, cut costs, and integrate with existing systems. By connecting the right information, the right systems and the right people, 3M can help you make the seemingly impossible, possible.

#### A single vendor for simplifying your technology needs

With 3M Health Information Systems, you can turn to one source for your document creation, management, and imaging needs.

- **3M™ ChartScript™ Software**—Permits your transcription department to work remotely via a web-deployed application. Our back-end speech recognition solution, SpeechMagic™ from Philips Speech Recognition Systems, is hosted in our secure data center and helps enhance transcription productivity.
- **3M™ VoiceScript™ Software**—Allows your care providers to dictate anywhere, anytime via phone, PC or PDA.
- **3M™ ChartScriptMD™ Software**—Our front-end speech recognition application, based on SpeechMagic, helps reduce transcription costs.
- **3M™ Electronic Signature Authentication Software**—Empowers your providers to sign and edit patient documentation anytime, anywhere.
- **3M™ ChartView™ Software**—Offers online viewing of patient information, clinical data, transcribed documents, and even paper records in one simple user interface.
- **3M™ ChartScan™ Software**—Uses our patented process to more efficiently capture patient records electronically.
- **3M™ ChartFact™/ChartLocator™ Software**—Analyze deficiencies, reduce chart completion time and simplify chart tracking for paper and electronic charts.
- **3M™ ChartRelease™ Software**—Simplifies the release of information process.
- **3M™ ChartQ™ Software**—Offers a workflow solution to drive the right information to the right people at the right time.

# 3M Health Information Systems Solutions for the IT Director

## Integrated, interoperable systems

3M applications can be integrated with your existing systems and are designed with ClickOnce deployment, making your job easier along the way.

3M also supports single sign-on integration, combining your dictation, transcription, chart management, abstracting, forms management, document capture and document viewing through a single vendor.

Bottom line? Lower costs. Higher productivity. And an easier job for you.

3M Health Information Systems works with industry-standard technologies and provides services to integrate with virtually any other vendor you are using for your ADT system, including Cerner, McKesson and Epic, or your RIS and PACS systems. 3M also has implementation experts to minimize the impact on your staff and support services to help you along the way. Consulting services are also available when needed.

## Operating systems
