Easy access anytime, anywhere.

Minimal change.

Less paperwork.

MORE TIME
for quality patient care

Healthcare Provider | Making it Humanly Possible

As a healthcare provider, you want technology solutions for documentation that free up, rather than take up, your time in delivering patient care.

You want tools that help you meet the increasing demands for compliance—in all its forms—while minimizing the changes to how you practice medicine. You want to access patient information from any location, at any time, especially if you're on call and need patient data "at your fingertips."

At 3M Health Information Systems, we know you are doing all you can to deliver quality care for your patients—and at the same time, keep accurate patient records. Our goal is to help you do even more by delivering user-friendly, flexible applications that save you time—and mirror the way you are working right now.

A simple solution from a single vendor

- **3M™ VoiceScript™ Software**—Lets you dictate anywhere, anytime via phone, PC or PDA.

- **3M™ ChartScriptMD™ Software**—Working in conjunction with the SpeechMagic™ technology from Philips Speech Recognition Systems, allows you to dictate and sign off on documentation without waiting for a transcription. It can also speed the creation of medical records with intelligent templates, so you can spend even less time dictating while improving accuracy and consistency for better coding and compliance.

- **3M™ ChartView™ Software**—View the entire medical record, even paper-based records from anywhere, on one easy-to-use screen.

- **3M™ Electronic Signature Authentication Software**—Sign and edit patient documentation anytime from virtually anywhere.

With 3M, you can rely on a trusted partner for all your technology needs in electronic medical records management.

Dictate, access, review, edit, and electronically sign patient documents from wherever you are—through one easy-to-use interface. Use standard dictation methods or create documents in seconds using your own templates. Improve the consistency and reduce the turnaround time of your dictations. Increase the time you spend with patients.

3M Health Information Systems solutions for the healthcare provider

Superior integration

We build systems that can talk to each other and to third-party systems. With superior integration capabilities and expertise, 3M designs applications to deliver healthcare solutions that work. Whether you are implementing a complex enterprise solution, driving a hospital-wide initiative, or choosing a single departmental solution, 3M can provide interfaces that enable our solutions to integrate with your current technology investments.

Ongoing support

3M Health Information Systems provides installation, training, and customer support to help you get the most from your information system investment. Our installations are designed to make system implementation as smooth as possible, while our software training provides live, highly interactive instruction through on-site and web-based sessions. Our support team is available 24x7 through our toll-free number or over the Internet at our clients-only website, www.3MCustomerCare.com.

About 3M Health Information Systems

Built on 25 years of experience delivering superior coding, grouping, and abstracting products, 3M Health Information Systems today provides exceptional value to its customers through end-to-end HIM solutions. From chart management to coding and grouping to abstracting to consulting, 3M products and services can help enhance healthcare operations, shorten revenue cycle times, improve patient care, and manage electronic records. Across the entire care continuum, across the entire revenue cycle, across multiple systems, 3M is working with you to redefine what is humanly possible.

Call today
